

Washing Machine Hoses

BPIR Declaration

Version: V1

Designated building product: Class 1

Declaration

Pacific Plumbing Supplies Ltd has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

Product/system

Name	Washing Machine Hoses
Line	Stainless Steel Washing Machine hoses with Elbow Fitting
Identifier	WH125E, WH150E, WH200E, WH400E, WH500E, WH600E, WH200EE, WH300EE

Description

Washing machine hoses (leakproof crimps) 304 grade Stainless Steel with EPDM inner pipe 20mmBSP fittings intended for use to supply hot and cold water to washing machines.

Hose lengths of 12.5m, 1.50m, 2m, 4m, 5m, 6m - Nylon Elbow end Fitting one end.

Hose lengths of 2m, 3m - Nylon Elbow end Fitting both ends

Rated for 6Bar - 70°C

Scope of use

The Washing Machine Hose's can be used in residential and small commercial applications systems for the supply of hot and cold potable water to washing machines, up to 70°C. Has a durability of less than 50 years – meaning it is not suitable to be placed behind concrete and other permanent structures.

Conditions of use

The Washing Machine hoses must be installed following the instructions of the Washing Machine manufacturer and the correct flow indication.

Relevant building code clauses

B2 Durability – B2.3.1 (b)

F2 Hazardous building materials – F2.3.1

G10 Piped services – G10.3.1

G12 Water Supplies – G12.3.2, G12.3.7

Contributions to compliance

B2.3.1 The Washing Machine Hoses, with Correct installation require only normal maintenance and continue to satisfy the performance requirements of this code.

F2.3.1 The Washing Machine Hoses are safe when handled. There are no requirements for this product to comply with Acceptable Solution F2

G10.3.1 The Washing Machine Hoses are manufactured to avoid the likelihood of significant leakage or damage during normal or reasonably foreseeable abnormal conditions, detrimental contamination of the contents by other substances, adverse interaction between services, or between piping and electrical systems, and people having contact with pipes which could cause them harm.

G12.3.2 / G12.3.7 The Washing Machine Hoses are protected from contamination; and installed in a manner that avoids the likelihood of contamination within the system and the water main; and installed as a component that will not contaminate the water. The Flexible hoses are manufactured to AS/NZS 3500 standards and avoids the likelihood of leakage; and allows reasonable access to components likely to need maintenance.
